FOUNDATION

MISSION

The mission of the FNSBSD Comprehensive School Counseling Program is to advocate and provide support for maximum student achievement in the areas of academic, career, and personal/social growth. School counselors work with parents, educators, and the community to provide developmentally appropriate and comprehensive services that meet the needs of all students in order for them to become productive members of an ever-changing global society.

PHILOSOPHY/BELIEF

As counselors of the FNSBSD, we believe:

- all students are capable of learning, achieving and acquiring knowledge in different ways and at different rates.
- all students are valued as individuals.
- all students have a right to, and will benefit from, a comprehensive counseling program that is culturally and developmentally appropriate.
- students, with their parents, are responsible for monitoring their educational progress, assisted by the professional school counselor.

and that counselors:

- help students recognize their learning strengths, weaknesses and potential.
- coordinate activities and programs that support the academic mission of the school.
- utilize the strengths of parents and the community and serve as liaisons between parents, the community and the school.
- serve as leaders in the advocacy of school reform and are key players in school reform.
- participate in on-going programs and professional development that enhance their skills and knowledge.

COUNSELOR ROLE

Among the skills that characterize a school counselor, the following are considered essential:

Skill	Description
Counseling	School counselors spend time on individual and group counseling, crisis intervention, prevention and responsive services.
Consultation	School counselors acting as consultants can help parents, teachers, and students work together effectively. They seek solutions to improve the educational/social/emotional experience for all students.
Coordination of Services	School counselors coordinate resources and services for students and families through community outreach. School counselors collaborate with agencies to provide a variety of services and opportunities to students and their families.
Leadership	School counselors seek to make schools a welcoming learning community where all students can achieve academic, career, and personal/social success.
Advocacy	School counselors are advocates for all students.
Teaming and Collaboration	Counselors collaborate with all school community members. Counselors collaborate most closely with teachers to deliver the counseling program. In addition, they use professional development opportunities to promote the counseling programs to members of the educational community and develop collaborative projects.
Use of Data	Data provides a method to determine the impact of a school counseling program on student success and school climate.
Use of Technology	School counselors are technologically literate and proficient in using the internet, communicating electronically, and processing data electronically to better assess student progress and program quality.

Benefits of a Comprehensive School Counseling Program

Comprehensive developmental school counseling programs provide a system that encourages and promotes academic, career, and personal/social development in preparation for the challenges of the 21st century. School counseling programs have a positive impact on students, parents/guardians, teachers, administrators, boards of education, school counselors, and the community.

Benefits for Students:

- Prepares students for the challenges of the 21st century by acquiring knowledge and skills in academic, career, and personal/social development
- Connects the educational program to future success
- Ensures student access to the school counseling program
- Promotes a rigorous academic curriculum for every student
- Promotes commitment to learning
- Supports development of skills to increase student success
- Ensures equitable access to educational opportunities
- Monitors data to facilitate student improvement
- Fosters advocacy for students
- Facilitates career exploration and development

Benefits for Parents:

- Prepares their children for the challenges of the 21st century through academic, career, and personal/social development
- Provides support for parents in advocating for their child's academic, career, and personal/social development
- Develops a systematic approach for their child's long-range planning and learning
- Increases opportunities for parent/school interaction
- Provides training and informational workshops

Benefits for Teachers:

- Promotes an interdisciplinary team approach to address student needs and educational goals
- Positively impacts school climate and the learning community
- Supports classroom instruction
- Increases teacher accessibility to the counselor as a classroom presenter and resource person
- Provides a system for co-facilitation of classroom guidance lessons
- Encourages positive, calendared activities and supportive working relationships
- Analyzes data to improve school climate and student achievement

Benefits for School Counselors:

- Provides a clearly defined role and function in the educational system
- Eliminates non-counseling functions
- Provides direct service to every student
- Provides a tool for program management and accountability
- Recognizes the school counselors as leaders, advocates, and change agents
- Ensures the school counseling program's contribution to the school's mission

Benefits for Administrators:

- Aligns the school counseling program with the school's academic mission
- Assists administration to use school counselors effectively to enhance learning and development for all students
- Provides a proactive school counseling curriculum addressing the students' needs and enhancing school climate
- Uses data to jointly develop school counseling goals and school counselor responsibilities
- Provides a means of evaluating the effectiveness of the school counseling program
- Demonstrates school counseling accountability

Benefits for Boards of Education:

- Provides rationale for implementing a comprehensive developmental counseling program in the school system
- Provides assurance that a quality school counseling program is available to every student
- Informs the community about the school counseling program
- Provides data about improved student achievement
- Demonstrates the necessity of appropriate levels of funding for implementation

Benefits for Student Services Personnel:

- Provides school psychologists and other professional student services personnel with a clearly defined role of the school counselor
- Fosters a positive team approach, which enhances cooperative working relationships
- Maximizes collaborative teaming to ensure individual student success
- Uses school counseling program data to maximize benefit to individual student growth

Benefits for the Community:

- Provides an increased opportunity for collaboration and participation of community members with the school program
- Creates community awareness and visibility of the school counseling program
- Connects the community to the needs of the school and the school to the needs of the community
- Enhances economic development through quality preparation of students for the world of work

Benefits for Business and Industry:

- Increases opportunities for business and industry to participate actively in the total school program
- Provides increased opportunity for collaboration among counselors, business, and industry
- Provides a potential work force with decision-making skills, pre-employment skills, and increased worker maturity

PROGRAM STANDARDS

The following standards were developed by the American School Counselor Association National Model, and adopted by the Alaska School Counselor Association State Model and the Comprehensive Counseling Program for Alaska Public Schools. They serve as the foundation of the FNSBSD Comprehensive School Counseling Program, and represent knowledge, attitudes and skills that all students will acquire and demonstrate in the areas of academic, career and personal/social development as a result of participation in the FNSBSD Comprehensive School Counseling Program.

Academic Development:

Standard A: Students will acquire the attitudes, knowledge and skills that contribute to effective learning in school and across the life span.

Standard B: Students will complete school with the academic preparation essential to choose from a wide range of substantial post-secondary options, including college.

Standard C: Students will understand the relationship of academics to the world of work and to life at home and in the community.

Career Development:

Standard A: Students will acquire the skills to investigate the world of work in relation to knowledge of self and to make informed career decisions.

Standard B: Students will employ strategies to achieve future career goals with success and satisfaction.

Standard C: Students will understand the relationship between personal qualities, education, training, and the world of work.

Personal/Social Development:

Standard A: Students will acquire the knowledge, attitudes, and interpersonal skills to help them understand and respect self and others.

Standard B: Students will make decisions, set goals, and take necessary actions to achieve goals.

Standard C: Students will understand safety and survival skills.

DELIVERY SYSTEMS

Counselors deliver services in four areas: school guidance program, individual planning, responsive services and system support. The suggested amount of time that counselors spend in each area is taken from the American School Counselor Association National Model. The student to counselor ratio recommended by the American School Counselor Association is 250:1. Research (*The Student to Counselor Ratio: Does it Matter*, Carrell and Carrell, 2006) suggests that lower student to counselor ratios have positive effects on the students in a comprehensive counseling program.

A. School Guidance Program

Representative Activities

- classroom instruction
- interdisciplinary activities
- group activities
- parent workshops and instruction

B. Individual Student Planning

Representative Activities

- individual or small group appraisal to analyze and evaluate students' abilities, interests, skills and achievement.
- individual or small group advisement involving students, parents or guardians and the school in planning students programs that meet their needs.

C. Responsive Services

Representative Activities

- consultation
- individual and small group counseling
- crisis counseling/response
- referrals
- peer facilitation

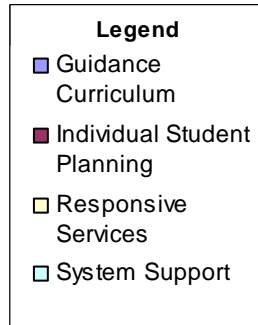

D. System Support

Representative Activities

MANAGEMENT SYSTEMS

District Wide Counseling Advisory Committee

An advisory committee is a representative group of persons appointed to both advise and assist the school counseling program within a school district. The FNSBSD Counseling Program Advisory Committee is advisory in nature and will offer suggestions about the counseling program and services, assist with continuous evaluation, revision, and improvement of the program, and express concerns from the community. Advisory council members reflect the community's diversity and include parents or guardians, counselors, business and community members. The council meets twice a year.

Yearly Counseling Program Calendar

A yearly calendar written by counselors in each school indicates overall counseling activities in that building. The yearly calendar indicates major activities, dates, and themes for the year. The yearly calendar will be made available to staff, students, and parents.

Use of Community Resources

Counselors will work with a variety of resources to implement the Comprehensive Counseling Program. Parents, students, community and business leaders, government officials, and school board members are utilized to provide counseling related services to students.

ELEMENTARY COMPETENCIES AND ACTIVITIES

ACCOUNTABILITY

Accountability and evaluation of the school counseling program are absolute necessities, and help to answer the question, “How are students different as a result of the school counseling program?”

Counselor Action Plan

As a first step in determining how students are different as a result of the counseling activities, an action plan is drawn up once a quarter to evaluate one specific counseling activity. A template of the Action Plan is contained in the Appendix. Information contained in the Action Plan should include:

- Grade Level
- Lesson Content
- ASCA Domain and Standard
- Curriculum and Materials
- Start and End Dates
- Number of Students Affected
- Location
- Evaluation and Assessment
- Contact Person

Assessment Tools

Means of evaluating counseling activities include pre and post tests, attendance rates, retention rates, grades, discipline referrals, and test scores. Other evaluation tools include school climate survey, school report card, student and/or staff surveys.

APPENDIX

DEVELOPMENTALLY APPROPRIATE STUDENT COMPETENCIES

The following charts indicate the developmentally appropriate grade levels where the competencies and indicators for each standard will be a major focus of targeted guidance activities for all students at that grade level. School counselors address all standards and competencies every day with students, but this chart indicates grade levels where the standards and competencies are addressed with planned activities that reach every student.

ALASKA CULTURAL STANDARDS FOR STUDENTS

The [Alaska Cultural Standards for Students](#) were developed by the Alaska Native Knowledge Network in 1988. They also were adopted by the State Board of Education and Early Development in the same year. The standards are broad statements of what students should know and be able to do as a result of their experience in a school that is aware of and sensitive to the surrounding physical and cultural environment. The standards are meant to enrich the Content Standards and provide guidelines for nurturing and building in students the rich and varied cultural traditions that continue to be practiced in communities throughout Alaska.

[Alaska Standards for Culturally Responsive Schools](#) were also developed for educators, schools, curriculum and communities by Alaska native educators to provide a way for schools and communities to examine the extent to which they are attending to the educational and cultural well being of the students in their care (*Source: Alaska Standards for Culturally Responsive Schools*).

#	Standard	Students who meet this cultural standard are able to:
A	Culturally-knowledgeable students are well grounded in the cultural heritage and traditions of their community.	<ol style="list-style-type: none"> 1. Assume responsibility for their role in relation to the wellbeing of the cultural community and their life-long obligations as a community member. 2. Acquire and pass on the traditions of their community through oral and written history. 3. Practice their traditional responsibilities to the surrounding environment. 4. Reflect through their own actions the critical role that the local heritage language plays in fostering a sense of who they are and how they understand the world around them. 5. Live a life in accordance with the cultural values and traditions of the local community and integrate them into their everyday behavior. 6. Determine the place of their cultural community in the regional, state, national and international political and economic systems.

ALASKA EMPLOYABILITY STANDARDS

The State Board of Education & Early Development has adopted into regulation Content Standards in various areas. Content Standards are broad statements of what students should know and be able to do as a result of their public school experience.

Employability Standards are a critical part of student learning. Proficiency in achieving Alaska’s content standards is fundamental to creating an employable individual. These employability standards are to be used in conjunction with Alaska’s academic content and performance standards to ensure Alaska students have the skills and knowledge necessary to be good citizens, effective parents, productive workers, and most of all, life-long learners. Alaska students are expected to learn how to learn and apply their skills and knowledge in a variety of settings to create a satisfying and productive life. These standards are designed to promote successful student transition from school to work.

Crosswalk: ASCA / NCDG/AK Employability Standards
