

# Forward Progress Athletics Consulting

---

Forward Progress is the industry leader in academic performance in athletics. No other athletics company is focused primarily on academic performance of college and high school student-athletes. The company consists of four former NCAA staff members.

Forward Progress started out by solely providing consulting services to NCAA colleges and universities, including evaluation of academic policies and structures, assistance through complex NCAA processes and provision of workshops.

In addition to assisting NCAA schools, Forward Progress now provides academic eligibility workshops on NCAA initial eligibility geared towards prospective student-athletes, their families, high schools, school districts and travel/club/AAU programs. The workshops guide attendees through various aspects of the NCAA academic eligibility rules.

Forward Progress also provides guidance to individual student-athletes and their families with all NCAA eligibility processes, with one-on-one attention and thorough individual student-athlete Academic Eligibility Reviews, providing a snapshot of the student's current academic standing. This review includes a detailed academic plan for moving forward towards NCAA eligibility.
